Misura delle scarpe:

Non ha senso cercare di identificare la misura delle scarpe secondo le taglie inglesi rispetto quelle francesi (quelle che usiamo noi), dato che il rapporto tra lunghezza del piede e misura varia tra marca e marca e spesso tra modello e modello.

La cosa fondamentale è misurare il piede in maniera corretta come indicato su <http://shoes.about.com/od/fitcomfort/ss/measurefeet.htm>

Ricordate che 1 inch (pollice) vale 2,54 cm:

$$\text{pollici} = \frac{(\text{centimetri misurati})}{2,54}$$
$$\text{centimetri} = (\text{pollici misurati}) \times 2,54$$
